About TiE Boston: Founded in 1997, TiE Boston connects tomorrow's founders with today's entrepreneurs, executives and venture capitalists, in its mission to foster entrepreneurship. Operating for 26 years now, TiE Boston's unparalleled network of successful, serial entrepreneurs are deeply engaged and committed to giving back to the community by providing mentorship, tactical advice, and expertise to rising entrepreneurs through signature programs. For more information, please visit <u>www.tieboston.org</u>

About the TYE program:TiE Young Entrepreneurs (TYE) fosters the next generation of leaders through the transformative experience of building a startup. This extracurricular program for exceptional high school students provides participants with the essential business and leadership skills to prepare them to succeed in college and beyond. Since its inception in Boston in 1995, TYE has expanded to be offered in 28 chapters worldwide. Boston's TYE program has provided foundational business knowledge to over 700 alumni. In addition to excelling at some of the world's best universities, our alumni have also started successful businesses and played impactful roles in fields such as biotech, artificial intelligence and software development.

TYE alumni have consistently reported the positive impact that TYE has provided them:

- 100% report increase of teamwork skills
- 97% report increased ability to lead
- 100% report increased confidence
- $\cdot$  90% report TYE influenced their decision to pursue a career path in STEM
- 40% report TYE inspired them to start their own company

2022-23 TYE Boston Yearbook

## 2022-2023 TYE BOSTON YEARBOOK

## Introduction

We are delighted to present the 2022-23 TYE Yearbook. The pitches, learning, mentoring, and students achievements from the 8 months spent in the program demonstrate the immense impact of the TiE Young Entrepreneurs program. Inspiring young leaders to grow in STEM and acquire the skills required to create their own business, develop financial literacy, or get better jobs has been the cornerstone of the TYE Entrepreneurship Academy.

When we first welcomed this cohort of 70 high school students in the Fall of 2022, we were looking forward to sharing and transferring know-how from the TiE Boston community, in the hope that we would detect new talents and help them achieve their dreams. Little did we anticipate then, that one of the teams from the cohort would go on to make us proud by securing the Second Place at the Global Finals the following Summer. Congratulations to team AquaSol, to their parents, and to the entire cohort that worked collaboratively and independently to unleash their creative thinking. At this celebratory moment, we would like to acknowledge the support of TYE sponsors: BNY Mellon through the Alice P Chase Trust, State Street Bank, Cambridge Innovation Center, and Suffolk University. The mentors and guest speakers who volunteered to honed students skills are a crucial part of the program, and we are grateful for their time.

To the students of the graduating Class of 2022-23: we are incredibly proud of you and your achievements. We believe that you will continue to make positive impacts on the world around you. We hope that the lessons you have learned from your experiences in TYE will continue to inspire and influence your lives. And, as you continue on this amazing path, may you remain powerful ambassadors for the TYE program!

With best wishes for your next exciting chapter,

Yash Shah

President, TiE Boston

Rowena Kay Mascarenhas

Executive Director, TiE Boston

#### 2022-23 TYE BOSTON YEARBOOK

## **TEAM PROFILES**

#### ADAM CARTER

Associate Program Director TiE Young Entrepreneurs (TYE) adam@boston.tie.org

Adam Carter is a creative, strategic thinker that has developed programs and educational initiatives, achieving measurable results across educational, non-profit and marketing sectors. He prides himself on being a global citizen and lifelong learner with strong cross-cultural skills developed through 25 years of work and travel in 116 countries.

Before becoming Associate Program Director for TYE, he was Academic Director of a private academy in China and also taught social studies and literature in international schools in Japan, Egypt and China. He created his own non-profit in 2009 and continues to assist humanitarian projects in Ethiopia, Myanmar and Guatemala. Adam holds degrees in Honor's Cultural Anthropology from University of Michigan, Master's Degree in International Affairs from George Washington University's Elliott School and a Master's Degree in Education from Moreland University. He was also a United Nations Fellow (Washington, DC) and Fulbright Scholar (Spain).

In his free time, Adam enjours practicing his four languages, traveling, cooking and hot yoga.

#### 2022-23 TYE BOSTON YEARBOOK

## **TEAM PROFILES**

#### **Marvin Vilma**

Instructor TiE Young Entrepreneurs (TYE)

Marvin Vilma is an educator, entrepreneur and nonprofit professional. His personal mission is to partner with organizations seeking to invest in teaching & learning to drive their success and innovation. As the Instructor for TYE Boston, he aspires to cultivate students' interest in developing their mindset and skill set for entrepreneurial and intrapreneurial activities.

He is the Managing Director of Development at Let's Get Ready and Founding Managing Director at Next Level Social Impact, and was previously a higher education professional, classroom teacher and founder. Marvin was born and raised in Queens, NY and attended Colgate University where he studied Sociology and French. He was a Community Fellow with the Institute for Nonprofit Practice, and completed a Masters of Science in Entrepreneurship Education at UPenn's Graduate School of Education. He is currently an MBA candidate at Questrom School of Business at Boston University.

Marvin enjoys traveling, Netflix binging, improving his culinary skills and spending time with friends.

## Shaurya Patni

Junior at Massachusetts Academy of Math & Science at Worcester Polytechnique Institute (WPI) interested in medical science, technology, math, and research methods.

Student Research intern at Massachusetts General Hospital/Harvard Medical School.

Won first-place award in National for Business Professionals of America, won a first-place award for medical innovation in the New England Regional competition.

Won top twenty award at the Health Occupations Students of America (HOSA)international leadership conference.

As a TYE 2021-22 participant, my team "Legendus" developed a start-up designed to let students review and publish the literary pieces of their classmates. We created a business plan and executed a peer-review communication hub for schools and students to read and critique classmates' writing in an encouraging and incentivizing environment overseen by the school.

My leadership role as TYE Co-Director taught me creative thinking, problem-solving, effective collaboration with TiE Boston and industry leaders. In addition, I evaluated and mentored new team ideas, and increased event outreach and marketing for TYE. I believe that tackling new challenges, research and development, meaningful innovation, and entrepreneurial mindset is crucial for our growth.

My favorite moment of being Co-Director in the 2023 program was lunch time and engaging in conversations with student cohorts from different backgrounds and perspectives.

As a TYE participant, we developed a business called FoodBound, which is an app that serves as the middleman to deliver leftover food from restaurants to homeless shelters.

Becoming a leader at TYE helped me better understand the process of developing a business as well as taught me skills in communication, teamwork and how to be a profound leader.

My favorite aspect of being a co-director was being able to take advantage of my creative freedom and have fun with the students to create marketing TikToks, interviews and more!

I am interested in pursuing a career in entrepreneurship, finance and/or economics. Throughout TYE, I was able to learn the ins and outs of a business and explore every aspect of the field, this helped me to narrow down a career path for my future.

## Nathan Riesenburger

Hi! I'm Nathan, and I started "Vitality" through TYE. Within Vitality, my team proposed an innovative solution to measuring user blood pressure, temperature, and heart rate (along with checking ECG for Atrial Fibrillation) from the wrist without any compression. Through this, my team won 3rd Place in the TYE Boston Final Pitch Competition and 1st Place in Massachusetts DECA for the EIP event.

As a co-director in TYE, I got to further understand the program's value firsthand. I watched the students grow from needing frequent mentoring to teaching me various leadership skills and entrepreneurial concepts. Furthermore, my favorite part of being a co-director was watching the culmination of this growth in the final pitch competition. The competition was also a great reminder of my personal development through TYE.

While I was a student, I gathered strong interests in entrepreneurship and medicine which I still pursue today. Along with pushing me towards fields I enjoy, TYE gave me the confidence, leadership, and entrepreneurship skills that allowed me to later found my own medical club, take on various initiatives, and pursue research.

## Varun Trivedi

Hi, I'm Varun Trivedi, and I worked with TYE to launch "Vitality." My team at Vitality came up with a creative way to measure a user's blood pressure, temperature, and heart rate from the wrist without compression. As a result, my team took home first place in Massachusetts DECA for the EIP event and third place in the TYE Boston Final Pitch Competition.

As a Co-director of TYE (The Young Entrepreneurs), my leadership experience has profoundly influenced my perspective on entrepreneurship. Overseeing and guiding young minds in developing innovative projects has demonstrated entrepreneurship's immense value to our community. Witnessing the transformative power of converting ideas into viable businesses has shown me how entrepreneurial ventures can drive economic growth and address societal challenges.

Furthermore, one of my favorite parts of being a director was the high growth of the students. At first, many struggled with the concept of entrepreneurship, but in the end, they were helping me understand and further my learning of entrepreneurship. All of them achieved so much during the program, and seeing that has made me proud, as I was able to help create an impact in someone's life. Just like these kids, TYE helped me understand the path of my future. I understood that I am deeply interested in entrepreneurship, but my passion lies even more closely with finance.

Exploring the world of business and investments excites me, and I am eager to leverage my financial acumen to drive successful entrepreneurial ventures.

## Vidhatri Pujar

As a TYE participant, our business idea was an attachment that goes on gym equipment that uses the kinetic energy created by the workout to generate green energy to power the gym and send excess energy to the grid to reduce the amount of greenhouse gases emitted in powering buildings like gyms. Our team name was Electrocise and we won 1st place in the Boston TYE pitch competition (Best Business Model).

As a co-director I got to see and sometimes guide the process of creating these ideas and the teamwork and skills that are gained through the process from an outside perspective. I saw participants struggle at the beginning of the year to even interact with their peers, and then by the end of the year be able to confidently present to a crowd of complete strangers this idea that they had collaborated with others for months and created. Being a co-director showed me how important entrepreneurship is, not just for the ideas or companies that are created, but for the communication and oratorical skills that are gained in the process as well.

My favorite moment/aspect of being a co-director in the 2023 program was the mock pitch day a couple weeks before the final pitch day. That day I was able to see the groups that had struggled and worked hard every TYE session, and at home despite their school work, present with confidence this idea that they had come up with and were so interested in. Additionally at the end of each presentation, I saw how eager each team was to get back their feedback, and no disappointment in any team regardless of the feedback, but instead constructive brainstorming and improvement that really showed growth in each person and exemplified the entrepreneurial mindset.

The academic fields I am interested in are Computer Science and specifically Cybersecurity. I am also very interested in Economics and Finance and hope to be able to pursue a career in that industry as well.

## Daksh Shah

Hi, my name is Daksh Shah. My TYE business idea was a company named Vitality which created a squeeze-free device meant to track patient vitals from this wrist. This made understanding your health highly efficient, less expensive, and more comfortable. We got third place in the final pitch competition along with winning the Entrepreneurial Passion Award.

Being a Co-Director has impacted my opinion of leadership as it has taught me the meanings of responsibility and accountability, and it has improved my ability to empathize with people. All good leaders need to be and feel responsible and accountable for the actions of their group members, good or bad because that is what makes them good leaders. Additionally, first being a student and then a leader at TYE, I understand the problems and the struggles that students go through when creating their business which helps me empathize with them.

My favorite aspect of being a Co-Director in the 2023 Program is the opportunity to guide people when they are in a tough spot. The ability to help students and then watch them accomplish something or come up with a solution to their problem is a great feeling.

Personally, I am interested in business finance which means studying financial management and financial decision-making within companies. Additionally, it involves learning how the business utilizes its funds to achieve its financial objectives.

## FINAL PITCH COMPETITION

Our 2023 TYE Final Pitch Competition was held at Suffolk Law School in Beacon Hill in downtown Boston with over 100 entrepreneurs, professionals and family members in attendance.

2022-23 TYE Boston Yearbook

## **GUEST SPEAKERS**

#### Gaugarin Oliver

Entrepreneur and Angel Investor at CapeStart, FullIntel & Oliver G. Foundation

#### Sheri Palazzo

Founder, Coach and Mentor at Saplings Consulting and Senior Advisor for Engineering & Operations with Altaeros

Using her work designing GPS hot-air balloons as a model, Sheri led a hands-on workshop on rapid prototyping, which involved students drafting product details for a necklace design.

#### George Ryan

CEO of Hatchwise and Founder of Flocksy

George and his brother/business partner led a Logo Design and Branding Session, focusing on the importance of a detailed Design Brief and Logo Design how-to session.

## **GUEST SPEAKERS**

#### Saniya Shah

Partner at ForUsApps, Forbes 30 under 30, Tedx Speaker & former CEO at Pilota (Exited to Hopper).

Being an esteemed TYE alumni, Saniya documented her entrepreneurial journey from college through her founding (and exit) from Hopper, and explained how she founded her current start-up ForUsApps. Students enjoyed learning from her experiences.

## Khusboo Vaidya

Founder & CEO at EdCalibre and Founder at Boarding Pass for Success.

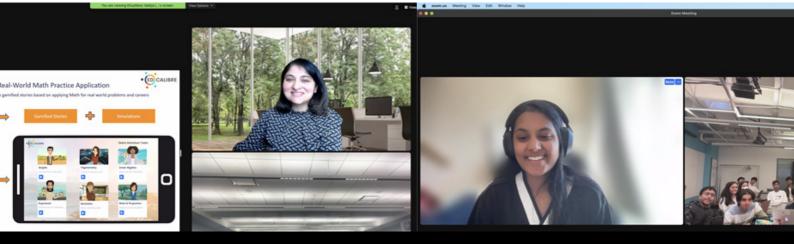

Khusboo led a tutorial about her gamified education platform, explaining how customer validation and successive prototypes resulted in her final product.

#### Aakash Shah

Co-founder & CEO High Time Foods and Partner at Wok Hospitality

Aksh spoke about the process and importance of customer discovery in the entrepreneurial process.

#### 2022-23 TYE BOSTON YEARBOOK

## MENTOR PROFILES

## Linked in

## GIRISH JUNEJA

#### SVP Chief Digital Officer at Dover Corporation

Girirsh is a General Management executive with cross-functional experiences in building technology driven businesses. He has extensive leadership experience in P&L management, go-tomarket strategy, ISV & OEM channels, engineering, product management and product marketing.

#### CARLOS OLIVEIRA Product Specialist at Harvard Innovation Lab

### SESHU PASAM

## Chief Technology Officer at Ariksa, a computer & network security company.

Seshu is a seasoned CTO/architect with 24 years of experience in a variety of cross-functional areas, including team building, architecture, hands-on implementation, rapid prototyping, security, mentoring, pre-sales, product management, customer success, marketing, and IT tasks. His expertise in Cloud, SaaS, Kubernetes/Container, Infrastructure/Application Security, Distributed Systems, Microservices, and Big Data has helped startups grow from the ground up, scaling from single digits to hundreds of employees.

#### SUHRID WADEKAR Counsel at Goodwin Procter LLP

Dr. Wadekar has advised large corporations such as Ansys, HTC, and Applied Materials, small companies, and start-ups, and research and educational institutions such as Draper Labs and Woods Hole Oceanographic Institution, in various patent prosecution and litigation matters related to: Software systems, Circuits and hardware systems, Medical devices, Social media and advertising systems and other devices and systems.

#### LAKSHMI JUNEJA

#### ECo-Founder & President, Kaiburr

Lakshmi isan accomplished technology leader who excels at delivering complex, mission critical products. She has deep program and project management skills, valuable experience in pioneering the startup of new organizations and possesses rich international exposure and a natural ability to forge relationships across diverse companies, cultures, and teams, with positive energy.

## PARTICIPANTS

Dear Adam, I wanted to start off by saying that I had such an amazing experience with TYE and that I have learned so much. TYE has really taught me more on how to properly start a business and it has helped me become more confident and improve my presentation skills. I am very grateful for both you and Marvin, and all the help you gave us!...Once again, thank you so much for everything. I hope to hear from you soon! Sincerely, Iesha Patel

Dear Mr. Carter, I wanted to express my enormous gratitude for all that you have done for me in TYE this year. From the moment the program began, you have been deeply inspirational to me. Hearing you speak of your experiences and work in India at the beginning of the year really resonated with me, and cemented in my mind an understanding that entrepreneurship is so much more than initially meets the eye, and that it can have a tangible effect on people's lives. This experience was no doubt a product of the tremendous effort that both you and Mr. Vilma put into making it a meaningful one. I am so appreciative of this; the experience is one that I will never forget, one that has inspired and taught me in ways that will impact me for the rest of my life. Thank you so much for your kindness, thoughtfulness, and guidance! I am so grateful to have had this opportunity to learn from you. Best Wishes, Dev

## PARTICIPANTS

TYE has helped me grow not only as a leader, but also as an entrepreneur. It has helped me realize that if you work hard and focus on your goals, anything is possible. TYE has also helped me realize that connections are so important in this world, and TYE gave me a great opportunity to connect and meet new great people. I will forever be grateful for the experience that TYE has offered me, and to my team who gave me all these fond memories. -Karthik Pisupati, AquaSol

TYE Globals has taught me one important thing, which is perseverance. In the competition, every other team seems like they are going to win. But the best thing to do is to just keep going and presenting the best you can. This was one of the concepts that I believe led to our team's success. The experience and skills that I learned from TYE Globals will help me become a more successful person in our current world. Soham Kulkarni, AquaSol

## PARENTS

#### Hello Adam

It was very nice meeting you on Saturday during TYE finals. Thanks so much for giving Raina this amazing opportunity as a co-coordinator and beyond. Skill set she has learned, during her TYE year and her volunteer year, is a real achievement. She has gained great confidence and is able to develop good leadership skills that I could see transferred to her other activities. I am sure future cohort students will also gain excellent experience. Hoping Raina can be part of TYE in some capacity. Thanks to Marvin and you for this amazing year for Raina.

Shraddha Oza-Patel (Raina Patel's mom)

Dear Adam,

I was catching up with Vivaan this week, and while he has some distance to cover, he has been extremely complimentary of the entire experience this past year. When we signed him up, he was a bit apprehensive about the program even though his elder brother (Vikrant) had been through it and remains a big advocate of it. He has gained tremendous value from the sessions and the partnership with his team to create something. There is a distinct and noticeable progression in his sense of confidence, belief in his capabilities, and appreciation of what it takes to create a new venture. I truly believe that these newly acquired skills will guide and shape a well-rounded perspective in the years to come.

Thanks, Sumeet

## PARENTS

Adam does an excellent job communicating to parents and keeping them informed about monthly others. Very thorough and detailed updates every time.

#### Dear Adam,

I just wanted to write and share our thanks for all your hard work and leadership during this TYE session. You created a program that was really engaging and allowed Suvi and the rest of her cohort to dive into the challenges (and the fun) of entrepreneurship, and we saw how much Suvi deepened her understanding of and passion for developing ideas, and building products and companies that can help to make the world a better place. You brought an inspiring creative perspective to each session, and have an incredible positive energy that is so needed in engaging youth. We really appreciated being kept in the loop, and seeing all the ideas and friendships develop throughout the program.

Naranth Carlille

We extend our heartfelt gratitude to BNY Mellon, Cambridge Innovation Center (CIC), Suffolk University and State Street Bank for their invaluable sponsorship and unwavering support. Their commitment to fostering innovation and nurturing the next generation of entrepreneurs is truly commendable. With their generous contributions, we have been able to create an enriching environment that empowers aspiring students to turn their ideas into reality. Their belief in the potential of our program not only empowers individual students but also fuels the growth of our local economy and community as a whole. Their partnership serves as a shining example of how collaboration between the corporate and academic worlds can drive positive change. Once again, we thank them for their dedication and investment in the future of entrepreneurship.

ClC Cambridge Innovation Center
